

HBS Knowledge

A Knowledge Graph and Semantic Search
for HBS

INCONECSS
May 17, 2022

Harvard
Business
School

Baker Library
Information Products
& Technical Services

Problem Solution

- Baker Library's answer to breaking down HBS data silos

Knowledge Graph

- For integration and discovery of HBS data across silos

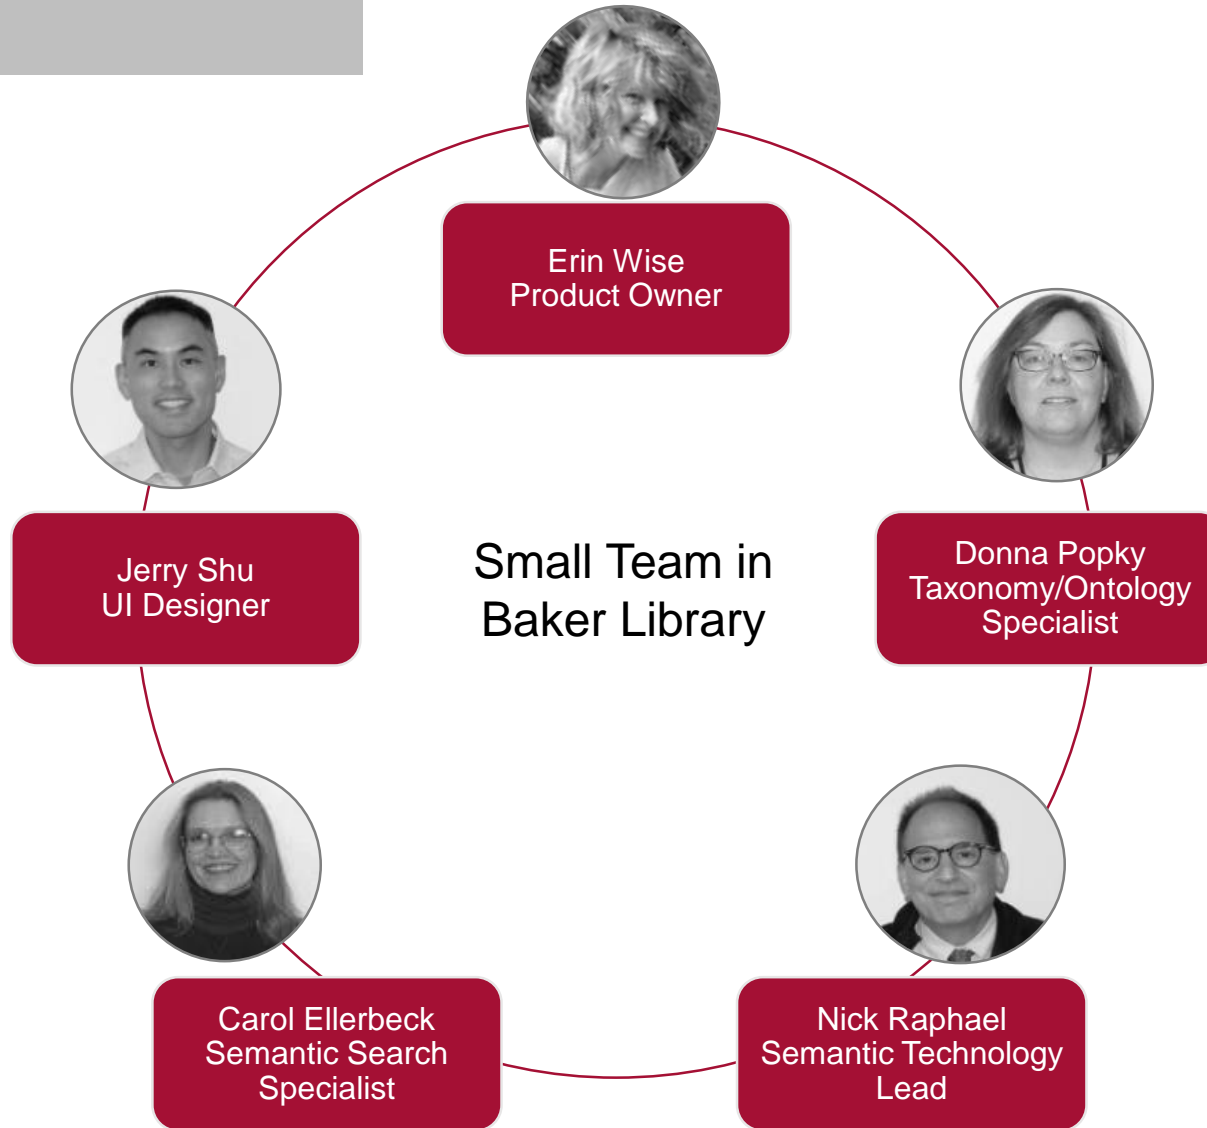

Semantic Search Application

- For ease of entity identification and findability

Vocabularies

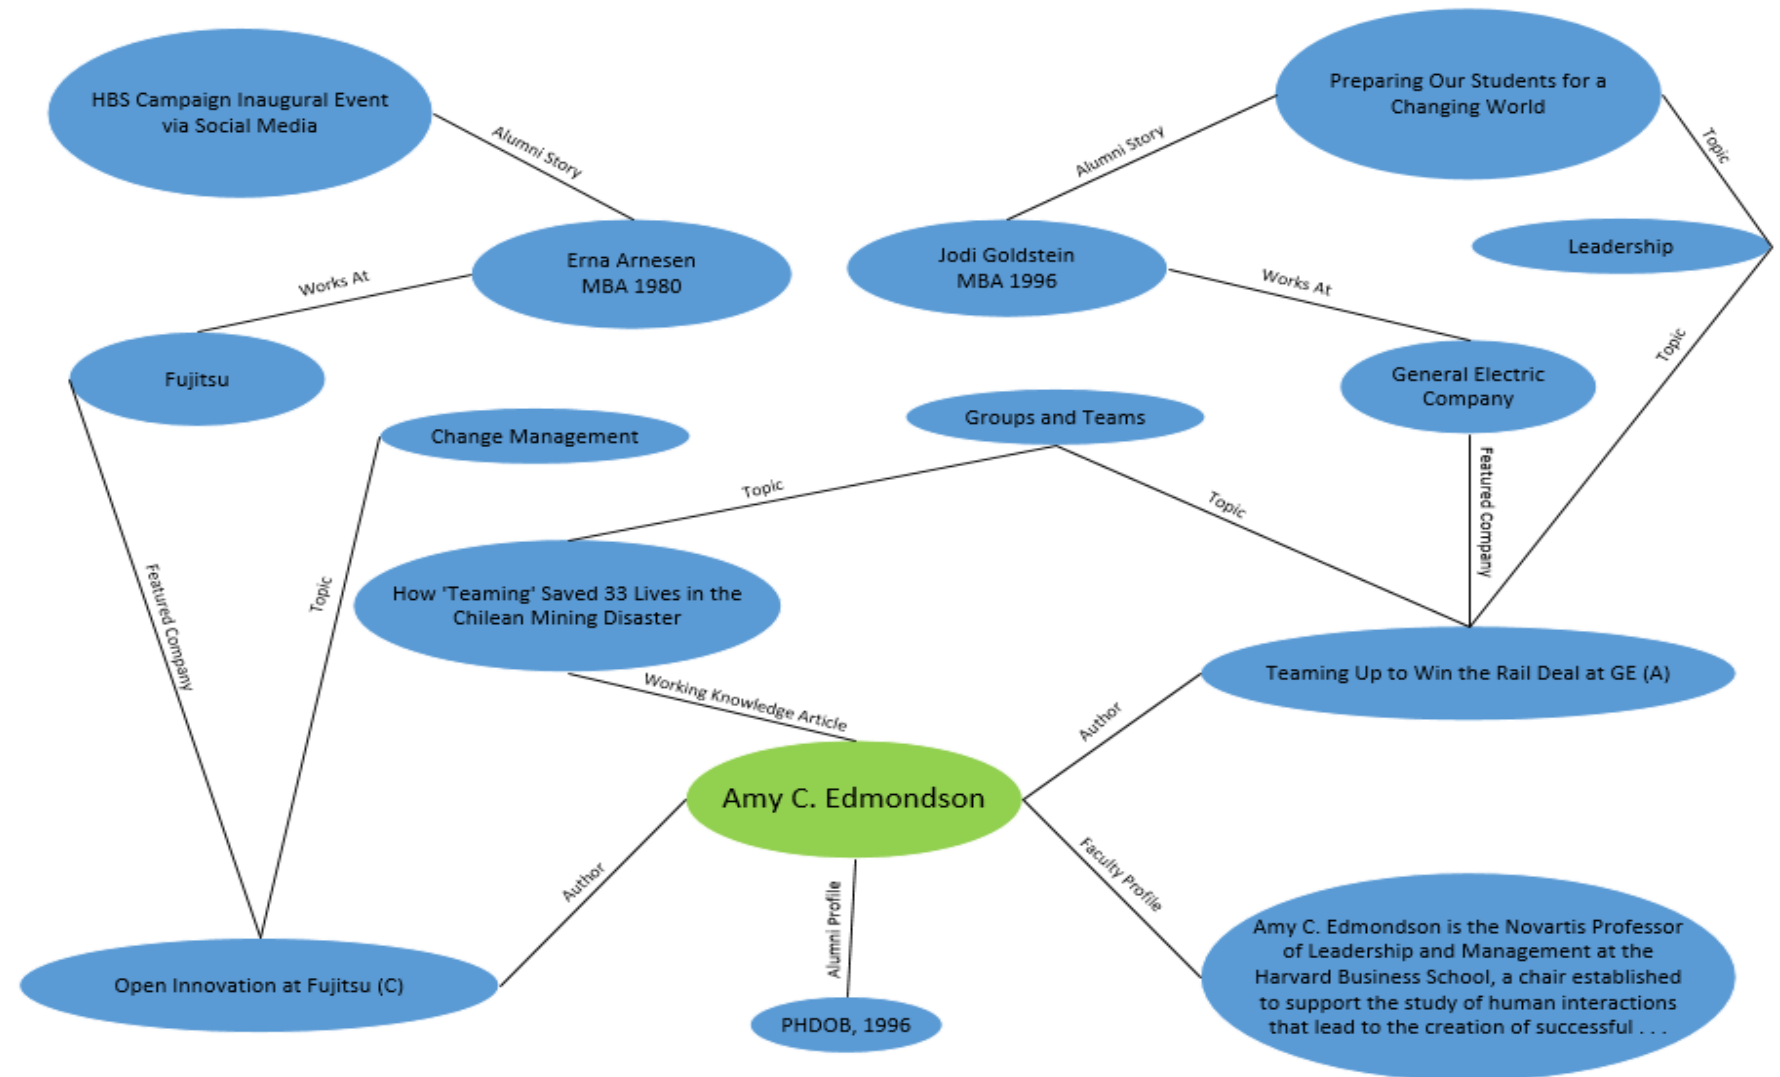

- For consistent, unambiguous language and entity identification

HBSK: Who is it?

What is a Knowledge Graph?

- A model of a **specific domain** created by subject-matter experts with the help of machine learning algorithms
- Provides a common structure and interface for data and enables the creation of multifaceted relations across databases
- Allows for an entity-centric view

What is Semantic Search?

Search with Meaning

- Uses our vocabularies and ontology to understand the intent of queries (“Michael Porter”)
- Not literal matches on query strings (Michael + Porter)

The screenshot shows the Harvard Business School Knowledge Graph search interface. At the top, the Harvard Business School logo and name are visible, along with a search bar containing 'michael porter' and a search icon. Below the header, the word 'KNOWLEDGE' is prominently displayed. A navigation bar includes links for 'ABOUT HBS KNOWLEDGE', 'DIGITAL TRANSFORMATION', 'WHAT IS A KNOWLEDGE GRAPH?', and 'TRUSTED SOURCES'. A breadcrumb trail shows 'Harvard Business School' → 'Knowledge' → 'Search Results'. Below this, there are filters for 'CONTENT TYPE', 'CONTENT SOURCE', 'GEOGRAPHIC AREA', 'TOPICS', and 'INDUSTRIES'. The search results are sorted by 'Relevance' and show 10 results per page. The first result is for 'Michael Porter on the new business agenda' from July 27, 2021, with a note that the content is not available. The second result is for 'In a new book, Katherine Gehl and Michael Porter argue for a new way of electing political leaders...' from June 22, 2020, also with a note that the content is not available. On the right side, a 'Person Information' box features a photo of Michael E. Porter, his name, his title as 'Bishop William Lawrence University Professor', and his HBS Academic Unit as 'Strategy'. It also includes a link to 'View full faculty profile on Faculty and Research website'.

Harvard Business School Knowledge curates, consolidates, and connects digital intelligence from across internal HBS sites and external trusted sources to help faculty, students, and alumni pursue their goals, to lead and to make a difference in the world.

What Is A Knowledge Graph?

It is a system that understands facts about people, places, events, and things called entities. And how these entities are all connected to each other.
